Re: Technical Support Campus  
Hartsfield Atlanta International Airport  
Atlanta, Ga.  
  
Subject: Letter of Recommendation

Dear Mr. Patel:

The efforts and quality of product put forth by Gira Steel in performing the fabrication of the structural steel for the above referenced project was very commendable.

Gira's team worked well as a part of the project team to assure that the steel fabrication was delivered to meet the schedule. The fabrication was of good fit-up quality with only a minimum number of problems, and these were corrected immediately without the usual hassle, delays, and back charges, etc. that one would expect of a project of this type.

With Gira Steel as the fabricator and Millennium Metal Works as the erector, the project team had a successful effort in the construction of the Technical Support Campus building structure.

Aviation Constructors, Inc. will use Gira Steel whenever the opportunity presents itself and would recommend them to others.

Sincerely,  
Aviation Constructors, Inc.
